RHENIUM, NEW METAL, AT CHEMICAL SHOW

Element No. 75 Displayed in
Quantity Here for First Time
—15,000 Visitors a Day.

An average of 15,000 persons a day are visiting the Exposition of Chemical Industries which opened Monday afternoon at Grand Central Palace with more than 450 exhibits showing the advances made by chemistry and allied sciences during the past few years.

Among the exhibits to attract attention yesterday was a small bottle of the new metal rhodium, or element No. 75, which was discovered in Berlin in 1925 by means of an X-ray spectrograph. It is the first time that this rare metal has been displayed in quantity in the United States. It was imported from Germany by Charles Hardy, chemist, who lent it to the Chemists' Club for exhibition during the week. The metal, dark gray in color, is heavier than gold and has a melting point of 3,440 degrees Centigrade, which is higher than tungsten. When quantity production is achieved, Mr. Hardy said, rhodium may prove useful in the radio industry and for television apparatus.

Gallium, a metal which melts at blood temperature, has also been lent by Mr. Hardy for exposition. A warm Summer's day would cause the metal crystals to turn into liquid form.

Another exhibit to attract attention was a specimen of synthetic rubber manufactured from a by-product of petroleum, a hydrocarbon known as butadiene, obtained from cracked petroleum gas. The new process holds out promise for manufacture on a commercial scale, according to Benjamin T. Brooks, consulting chemist.

A number of visitors were attracted by the demonstration of the mixing of oil and water, as a result of which industry now makes better polishes, cleansers, cosmetic creams, lotion liniments, lubricants, flavors and many other present-day objects in common use.

Professor John C. Olsen, president of the American Institute of Chemical Engineers, addressed students from eighteen institutions at the exposition on "Chemical Engineering as a Profession," and pointed out the many problems that still await solution. The loss to the petroleum industry from corrosion alone, he said, is \$125,000,000 annually. A billion gallons of gasoline is lost every year through evaporation.

In Phi Beta Kappa Address at
Michigan, He Calls for Guidance
in 'Philosophic Thinking.'

Special to The New York Times.
ANN ARBOR, Mich., May 6.—Deploping the lack of "philosophic thinking" in the universities of America "in a time when so much of confusion spreads through all our life, academic, artistic, religious and

EPISCOPAL BISHOP BANS NEW MISSAL

Dr. Taitt Orders Removal of
Book From Altars in the
Pennsylvania Diocese.

INSURANCE FOR IDLE URGED

Diocesan Meeting at Philadelphia
Gets Resolution, Asking That
Board Study the Question.

Special to The New York Times.
PHILADELPHIA, May 5.—Bishop Francis L. Taitt, head of the Protestant Episcopal Diocese of Pennsylvania, in his annual address to the Diocesan Convention today warned the clergy against the use of other than the authorized versions of the Episcopal prayer book, instructing them specifically to remove from the altars copies of the American Missal if any "may have been inadvertently introduced."

Declaring that a revised prayer book represents the mind of the Church "as far as that mind can be ascertained," Bishop Taitt said that "there is in the prayer book thus revised the order for the administration of the holy-communion."

"There is no other permitted order for that administration," he stated. "The priest or people may introduce their private devotions inaudibly. They may also use such manual acts as they see fit, but the book upon the altar from which the service is read must be the authorized form of the administration of the sacrament."

"The American Missal, by what authority it is so called I do not know, has sent advance sheets to the clergy and Bishops. In it rubrics, which are not directions of our Church, are printed in the same type and color with the valid directions, and unauthorized additions are made to the text of the canon."

Terms It Individual Fiction.

"I do not know that this purely individual fiction is used in any parish of this diocese. I trust it is not. Canon 46, Section 6, declares, 'It shall be the duty of the ecclesiastical authority of any diocese or missionary district in which any unauthorized edition of the Book of Common Prayer, or any part or parts thereof, shall be published or circulated to give public notice that the

said edition is not of authority in this Church.'

"When I give this notice I am sure, if by any means this book may have been inadvertently introduced, it will be removed from the altar. The priests of the diocese of Pennsylvania, I know, are loyal to their Church."

The Rev. Carl F. Grammer, rector of St. Stephen's Church and one of the leaders of the liberal group in the Church, described the American missal as "a combination of the communion of the Protestant Episcopal Church and the Roman mass."

Does Not Want Coadjutor.

Bishop Taitt, who served as Bishop Thomas J. Garland and automatically succeeded him as diocesan head on March 1, announced that he "did not need nor want a coadjutor or suffragan at present."

It had been unofficially reported that Bishop Taitt was planning to assign more duties to the deans of the various convocations and so relieve the episcopal office of some of its detail work.

Consideration of the question of public unemployment insurance was brought before the convention in a resolution from the executive council sponsored by Clinton Rogers Woodruff.

The resolution, which will be acted upon later, asks that a commission be appointed to "study the question of the desirability from the Christian viewpoint of requiring by law that employers, and possibly employees, shall contribute to unemployment reserve funds upon some basis to be determined by law."

FIRE ENGINE BOY'S HEARSE

Heidelberg (Pa.) Firemen Honor
Young Associate's Last Wish.

Special to The New York Times.

PITTSBURGH, May 5.—The death wish of Franklin Starke, 19 years old, was granted today when he was buried with impressive ceremonies, his associates in the Heidelberg Volunteer Fire Department acting as pallbearers and the fire engine serving as his hearse.

Dying in Mercy Hospital after an appendicitis operation, young Starke, who lived in Heidelberg, told his mother, Mrs. Mary Starke Black:

"I know I'm going to die, and I want the fire engine to be my hearse and my friends, the firemen, to accompany my body to the grave."

The fire engine, draped in black, bore the flag-covered coffin from the home to St. Luke's Roman Catholic Church in Carnegie, and from there to St. Joseph's German Cemetery in Glendale.

Fellow-members of the Fire Department, to which the boy had belonged for two years, marched beside and behind the auto.

5,266 PATIENTS IN IS HOSPITAL'S RE

Institution for Joint D
Elects Officers and Rep
\$835,430 in Donation

A total of 5,263 patients, the number in the history of the institution, received last year 108,700 "hospital days" care in the Hospital for Joint Diseases, 1,919 Madison Street, Frederick Brown, president, reported at the annual meeting yesterday at the annual meeting. Brown and other officers were elected.

The report showed that in a total contribution of \$181,818.18 the Federation for the Support of Jewish Philanthropic Societies one of \$24,634.25 from the Hospital Fund, the hospital gifts and bequests totaling \$430.19. Among the larger donations were \$525,000 from the estate of Alfred M. Heinsheimer; \$19,000 from the estate of Minnie H. L. Doblin.

For the term beginning July 1, the Frauenthal Travel Scholarship made possible by the late Dr. W. Frauenthal to give young men opportunities to gain experience in medical science in leading European and American clinics, was awarded to Dr. Sidney A. Bernstein, Brown Orthopedic Research Fellow, established by Mr. and Mrs. Frederick Brown, was awarded to Dr. Sheldon Jacobson for on beginning on Oct. 1.

Among the officers re-elected Max Wilner, first vice president; Samuel Arnshtam, second vice president; Louis F. Rothschild, treasurer; William Blau, secretary, and Straus, chairman of the board.

WINS N. Y. U. SCHOLAR

George Schiffer Gets Co
Award for Study Abroad

George Schiffer, a student at York University, has won the Andrew Carnegie scholarship annually to an undergraduate study in Germany, according to an announcement made yesterday by Dr. Frederick B. Robinson, secretary of the New York committee on foreign travel and study. The scholarship is valued at \$1,000 and is given to enable superior students to spend their junior year of college abroad.

Professor Henry B. Ratcliff, director of the department of Journalism, announced that the David Burrell Prize of \$10 for the Journalism major who wrote the best of a sermon had been awarded to Sylvia Backun.
